

MARVIN ADRIANO RUSDIANTO

0895391667628 | marvin.rusdianto17@gmail.com | www.linkedin.com/in/marvin-adriano | https://marvinadr.vercel.app

Jakarta, Indonesia

Computer Science undergraduate at BINUS University, specializing in Intelligent Systems (AI), with a strong interest in AI Engineering and Frontend Development. Familiar with Python, machine learning tools, and various programming technologies. Experienced in hands-on projects and team collaboration, with strong problem-solving and adaptability skills. Passionate about applying AI and technology to solve real-world problems and developing practical solutions. Currently seeking an internship opportunity to gain practical experience, strengthen technical skills, and contribute to the company.

EDUCATION

Kalam Kudus Christian High School - Sukoharjo, Central Java — Jun 2021 - Apr 2024

Senior High School, Mathematical and Natural Sciences

Bina Nusantara University - West Jakarta — Sep 2024 - Sep 2028 (Expected)

Undergraduate Computer Science - Intelligent Systems, 3.65/4.00

PROJECTS

AirBlocks - Computer Vision Block Puzzle Games — Feb 2026 - Jun 2026

- Built a hands-free block puzzle game using Flask, OpenCV, and MediaPipe for real-time computer vision-based interaction.
- Implemented 21-landmark hand gesture controls for hands-free gameplay.
- Achieved a 65.38% interaction success rate at 14.8 FPS.

Onoma Trace - Personal Name Origin & Nationality Classifier — Feb 2026 - Jun 2026

- Built an NLP system to classify names across 104 countries using character-level TF-IDF.
- Applied Logistic Regression, LinearSVC, and SGD for name classification.
- Achieved 0.501 macro-F1 and 77.1% top-5 accuracy.

Waste Type Detection - AI-Powered Waste Type Detection — Sep 2025 - Dec 2025

- Built a real-time waste detection app using Streamlit and YOLOv8.
- Trained and deployed a model to classify six types of waste.
- Achieved 53.3% mAP@50 on waste detection.

IndoShield - Hate Speech & Abusive Language Detector — Feb 2026 - Jun 2026

- Built a Streamlit application for Indonesian abusive language detection.
- Applied TF-IDF with Logistic Regression, SVM, and Naive Bayes, achieving 0.74 macro-F1.

Adaptime - Adaptive Energy-Based Smart Scheduling App — Feb 2026 - Jun 2026

- Built a React-based time management app using JavaScript and Firebase.
- Implemented task management, scheduling, and deadline features.

CarValueID - Machine Learning Used Car Price Prediction — Feb 2026 - Jun 2026

- Built a Streamlit app for used car price prediction.
- Applied data preprocessing and machine learning models, achieving an R^2 score of 0.587.

EXPERIENCE

Berlian Event Organizer - Semarang - Central Java — Oct 2025 - Present

Freelance Crew Usher

- Supported event operations involving lighting, sound, and multimedia equipment.
- Coordinated with team members to ensure smooth event execution and respond to operational issues.

SKILLS

- **Languages**: Python, C++, JavaScript, HTML, CSS
- **Libraries**: NumPy, Pandas, scikit-learn, OpenCV, MediaPipe
- **Frameworks**: React, Flask, Streamlit, Gradio
- **Tools & Platforms**: Git, GitHub, VS Code, Hugging Face
- **Soft Skills**: Teamwork, Leadership, Communication, Problem Solving, Adaptability
